

7

2 releases all of its loops.

8

Now do the *Caroline Extension*, as illustrated on pages 9-10: (2 picks up lower 1f while 1 presses against the side of 2; 345 fold down over 5f and wrists turn so that 2f and double 5f form frame strings).

9

The resulting design represents a squinting face (eyes are hidden).

10

*Action:* To 'raise the eyebrows' and reveal the eyes (a pair of small diamonds), unfold 345 and extend widely with palms facing away. This lengthens the 5 loops.

Upon lengthening the 5 loops, the string labeled with an asterisk in the above photo will curl around the upper frame string and become a transverse horizontal string.

Repeat the *Caroline Extension* as often as desired to make the face squint and unfold.
